

What is claimed is:

1. A stable skin care product comprising:

a first composition comprising about 0.001% to about 10% of a retinoid;

a second composition comprising about 0.0001% to about 50% of at least one retinoid booster;

a first compartment for storing the first composition, wherein the first compartment keeps the first composition out of contact with oxygen; and

a second compartment for storing the second composition, the first and second compartments being joined together.

2. The stable skin care product of claim 1 wherein the second composition has at least two retinoid boosters in an amount of about 0.0001% to about 50%.

3. The stable skin care product of claim 1 wherein the first compartment is made out of aluminum.

4. A method of conditioning skin, the method comprising applying topically to the skin the product of claim 1.

5. A method of mimicking the effect on skin of retinoic acid, the method comprising applying to the skin the product of claim 1.

6. A stable skin care product comprising:

a first composition comprising about 0.001% to about 10% of a retinoid to  
5 provide a first benefit;

a second composition comprising about 0.0001% to about 50% of at least  
one retinoid booster to boost the first benefit;

10 a first compartment for storing the first composition, wherein the first  
compartment keeps the first composition out of contact with oxygen; and

a second compartment for storing the second composition, the first and  
second compartments being joined together.

15 7. The stable skin care product of claim 6 wherein the second composition has at  
least two retinoid boosters in an amount of about 0.0001% to about 50%.

8. The stable skin care product of claim 6 wherein the first compartment is made  
20 out of aluminum.

9. A method of conditioning skin, the method comprising applying topically to the  
skin the product of claim 6.

25 10. A method of mimicking the effect on skin of retinoic acid, the method  
comprising applying to the skin the product of claim 6.

11. A stable skin care product comprising:

5           a first composition comprising about 0.001% to about 10% of a retinoid to  
provide a first benefit;

          a second composition comprising about 0.0001% to about 50% of at least  
one retinoid booster to boost the first benefit;

10

          a first compartment for storing the first composition, wherein the first  
compartment keeps the first composition out of contact with oxygen; and

15

          a second compartment for storing the second composition, wherein the  
second compartment keeps the second composition out of contact with oxygen; and  
wherein the first and second compartments are joined together.

12. The stable skin care product of claim 11 wherein the second composition has at  
least two retinoid boosters in an amount of about 0.0001% to about 50%.

20

13. The stable skin care product of claim 11 wherein the first and second  
compartments are made out of aluminum.

25

14. A method of conditioning skin, the method comprising applying topically to the  
skin the product of claim 11.

15. A method of mimicking the effect on skin of retinoic acid, the method  
comprising applying to the skin the product of claim 11.
